ikc-deal(backend)

The project was a private project of a BITS alumni. The goal of the project was to create the backend of the ikc-deal mobile app with NodeJs and deploy it on aws.
ikc-deal is a mobile application that provides various service like shopping, affiliate marketing, auction, mobile recharge and an inbuilt wallet.
The project was done by two JavaScript developers in about 1.5 months.

BITS Pilani Website

The project is to build the official website of Birla Institute of Technology and Science (BITS) along with a content management system (CMS). The project is currently in progress under the professor Yashwardhan Sharma of BITS Pilani. The team working on the project consists of 4 members 2 backend and 2 frontend developer. The backend of the project us written in django and the frontend is written with HTML, CSS, jQuery and vanilla JS. My role is of a frontend developer.
